

## RISH Clamp 1000A/300A AC-DC

TRMS 3 3/4 Digits digital Clamp meter with VFD measurement feature

### Data Sheet

3 3/4 Digits digital  
Clamp meter

## Application

**RISH Clamp** 1000A/300A measures important electrical parameters like AC Current (TRMS), DC Current, AC Voltage(TRMS), and DC Voltage. It also features Capacitance, Ohm & Continuity, frequency, and Duty cycle and temperature measurement.

## Product Features

### Unique Design

Rish *Clamp* 1000A/300A is a highly innovative design for features those increases **safety** and **comfort** of user.

- Rotating clamp jaws facilitate the measurement at physically awkward positions, vertical bus bars, conductors placed at positions difficult to access.
- Clamp jaws can be opened or closed with the trigger placed at bottom side away from the jaws. This allows the user to place his/her hand at safer distance from live conductor. This greatly reduces exposure of human beings to electrical shocks
- Location and design of trigger eliminates fatigues caused by single finger operation. It allows spreading the force required to open the jaws over more than one finger to ensure comfortable operation.
- Comfortable operation of push buttons and function selector switch, in adverse field conditions.

### Large Jaw Opening

For RISH CLAMP 1000A AC-DC Jaw opening of 51mm for standard wire diameter of 50mm and for RISH CLAMP 300A AC-DC Jaw opening of 41mm for standard wire diameter of 40mm for 300A

### Narrow Body

Narrow housing for firm grip and easy to carry.

### High Accuracy for low current measurement

The clamp meter can measure accurately at not only the High currents but also Low current ranges.

### True Root Mean Square (TRMS) measurement

Clamp meter measures AC signal's root-mean-square value accurately irrespective of the shape of input waveform.

### Measurement on Variable Frequency Drives

The clamp meter can measure accurately on variable frequency drives (VFD) and UPS.

### User selectable Backlit : (Optional)

It is possible to conduct measurement using the clamp meter during night time in darkness with the help of Backlit. The back lit can be switched ON or OFF by pressing a single key.

### Temperature measurement

Temperatures from -200 to 800 °C using Pt 100 and Pt 1000 sensors.

### AUTO POWER OFF

In order to save the power of the Batteries, the clamp meter will automatically shut OFF if it detects no activity for 10 minutes.

### Analog Scale

Analog scale that updates at the rate 20 times/sec to observe fluctuations in input.

## CONTINUOUS ON MODE

In this mode, AUTO POWER OFF is disabled.

## DATA Hold Function

By pressing DATA HOLD button, reading on the display can be latched for Hands free operation.

## MIN,MAX Function

By pressing MIN/MAX button, the clamp meter will start recording latest Minimum and Maximum readings

## NULL ZERO Correction for Resistance

For Low ohm measurement, the lead resistance can be compensated by pressing the shift key (Yellow Key)

## NULL ZERO Correction for Capacitance

Null zero connection for capacitance. For nF range, stray capacitance can be compensated by shift key (Yellow Key)

## AUTO and MANUAL ranging modes

In AUTO ranging mode the instrument automatically selects the range with best resolution depending on the applied input. In MANUAL ranging mode range is user selectable using MAN key.

## Diode Measurement

For testing diode and transistors, diode measurement function is available.

## Protection from dust and water

IP20 for terminals as per IEC60529

## Applicable International Safety standards

600 V CAT IV/1000V CAT III as per International Safety standard IEC 61010-1- 2010

## Double molded Cover for soft touch and firm grip of the Instrument
